

SMC Energy-saving in Pneumatic Equipment at Manufacturing Plants

Friday, 23 September 2022

It is our honour to have a speaker from Singapore Institute of Technology, Mr Abid Ali to make known the “Energy Efficient Fund” to all our participating companies. This fund is to help companies to be more energy-efficient and more energy-saving and sustainable on behalf of the National Environment Agency.

Thank you to all customers for your participation. Indeed, this seminar has been very successful and eventful with lots of participation and demonstration of SMC demo panels; not to mention we have fun-filled quiz games with prizes for our most accurate, fastest finger & brain.
