

# SMC Energy-saving Solutions in Pneumatic System towards Digitalization & Sustainability seminar

SMC SG conducted an “Energy-saving Solutions in Pneumatic System towards Digitalization & Sustainability” seminar held on 14-July-2023. We are proud to have brought together an amazing group of 56 customers. Many are keen to know SMC energy saving products and solutions, and especially Air Management System, how it can help reduce waste of compressed air in your factory environment substantially.

Thank you for being part of such a wonderful event. We look forward to seeing you again in our future seminar!
